## Project Title: Video Game Website

I'd like to build this site as multiple pages, rather than a long, single page website. Site navigation across the top, using video game UX to influence look and feel of site. I want pages to look like the era of video games they are talking about

**Home / Introduction** -basic terminology of video games and genres

**Origins**

**Platforms**

**Development**

**Industry**

**Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
